Professional Summary

Final-year CSE (AI & ML) student with hands-on experience in Python, scikit-learn, React.js, and end-to-end ML workflow development. Built classification and sentiment-analysis projects using data cleaning, feature engineering, model training, and evaluation metrics. Comfortable with Git-based development and familiar with building modular, API-ready solutions for ML use cases. Strong interest in FastAPI-style model serving, similarity/ranking workflows, and practical machine learning engineering.

Education

Vellore Institute of Technology **Sep 2022 – Sep 2026**
Bachelor of Technology in CSE (Artificial Intelligence and Machine Learning) *CGPA: 8.6*

Professional Skills

Languages: Python, SQL, HTML, CSS, JavaScript

ML/Data: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Web&API: React.js, FastAPI , REST APIs

Tools: Google Colab, VS Code, Jupyter Notebook, Git, GitHub, Excel

Concepts: Classification, similarity metrics, embeddings, evaluation metrics, data preprocessing

AI Tools: ChatGPT, Claude, Perplexity, Gemini

Projects

Sentiment Analysis Using EEG Signals  | Python, NumPy, Pandas, scikit-learn, Matplotlib

- Developed a machine learning workflow for EEG-based sentiment/emotion classification using Python and scikit-learn.
- Performed data preprocessing, feature extraction, model training, and evaluation to analyze signal patterns from EEG data.
- Compared classification performance across models and visualized results to support interpretation and model selection.

Product Reviews Sentiment Analysis  | Python, Pandas, scikit-learn, Matplotlib

- processed 25K+ Amazon product reviews and trained a Logistic Regression model for sentiment classification, achieving 81.6% accuracy on test data
- Implemented end-to-end pipeline: data cleaning, text preprocessing, TF-IDF vectorization, model training, evaluation using confusion matrix and classification report.
- Visualized frequent positive and negative terms using Matplotlib to generate product-level insights useful for business decision making.

Experience

SmartInternz **Jul-Sep 2025**
Internship

- Completed virtual internship on generative AI concepts with hands-on Google Cloud implementation (Vertex AI).
- Built and deployed sample LLM-based applications, experimenting with prompt design and API integration for real-world use cases.

Certifications

- Python -Infosys SpringBoard
- BLOCKCHAIN -IBM
- MERN FULL STACK -ETHNUS
- Generative AI- Microsoft
- DataAnlysis -Microsoft
- Business Analytics -Simplilearn
