Professional Summary

Computer Science graduate specializing in Artificial Intelligence and Machine Learning with a strong foundation in Python, SQL, data processing, databases, and machine learning. Hands-on experience working with structured and unstructured datasets using Pandas, NumPy, and scikit-learn, including data cleaning, transformation, feature engineering, model development, and evaluation. Familiar with Python-based technical workflows, notebook development, APIs, and cloud-based AI tools, with strong analytical and problem-solving skills and an interest in Data Engineering and Analytics.

Education

Vellore Institute of Technology

Sep 2022 – Sep 2026

Bachelor of Technology in CSE (Artificial Intelligence and Machine Learning)

CGPA: 8.6

Technical Skills

Programming: Python, SQL, HTML, CSS, JavaScript

Data: Pandas, NumPy, Data Cleaning, Data Transformation, EDA, Excel

Databases: SQL, RDBMS Concepts, Querying, Data Management

Machine Learning: scikit-learn, Classification, Regression, Clustering, TF-IDF

Development: Jupyter Notebook, Google Colab, FastAPI, REST APIs, Git, GitHub

Cloud / AI: Google Cloud Vertex AI, Generative AI Fundamentals

Projects

Product Reviews Sentiment Analysis 📄 | Python, Pandas, scikit-learn, Matplotlib

- Processed 25K+ Amazon product reviews using Python and Pandas and developed a Logistic Regression model for sentiment classification, achieving 81.6% accuracy.
- Implemented a structured workflow covering data cleaning, text transformation, TF-IDF feature extraction, model training, and evaluation.
- Analyzed classification results using confusion matrices and evaluation reports to identify patterns and improve model understanding.

Sentiment Analysis Using EEG Signals 📄 | Python, NumPy, Pandas, scikit-learn, Matplotlib

- Developed a Python-based machine learning workflow for EEG sentiment and emotion classification.
- Performed data preprocessing, feature extraction, transformation, model training, and evaluation on signal data.
- Compared multiple classification approaches and visualized evaluation results to support analysis and model selection.

Experience

SmartInternz

Jul – Sep 2025

AI / Cloud Intern

- Completed a virtual internship focused on Generative AI with hands-on implementation using Google Cloud Vertex AI.
- Built sample AI applications involving API integration, prompt design, experimentation, and evaluation of model outputs.
- Worked with cloud-based tools and structured development workflows to build, test, and evaluate technical solutions.

Certifications

- | | | |
|--------------------------------|-----------------------------|------------------------------------|
| • Python – Infosys SpringBoard | • Data Analysis – Microsoft | • Business Analytics – Simplilearn |
| • Generative AI – Microsoft | • MERN Full Stack – Ethnus | • Blockchain – IBM |
