Professional Summary

B.Tech (CSE, AI & ML) graduate with a strong technical foundation across software, data, and cloud platforms, plus hands-on project/internship experience translating technical concepts into clear, customer-facing explanations. Quick to pick up new tools and problem spaces, backed by certifications across cloud, data, blockchain, and business analytics. Strong communicator looking to apply analytical thinking and product curiosity to a technical presales role.

Education

Vellore Institute of Technology	Sep 2022 – Sep 2026
<i>Bachelor of Technology in CSE (Artificial Intelligence and Machine Learning)</i>	<i>CGPA: 8.6</i>
Bhopal, India	

Professional Skills

Technical Foundation: Python, SQL, HTML, CSS, JavaScript, React.js – multi-platform hardware & software fluency

Tools: Git, GitHub, Excel, Jupyter Notebook, Visual Studio, Google Colab

Business/Analytics: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn – data-driven decision making

Core Strengths: Technical communication, customer-needs analysis, solution positioning, analytical decision-making, fast onboarding to new technologies

AI Tools: ChatGPT, Claude, Perplexity, Gemini – used regularly for research and problem-solving

Relevant Experience

<i>SmartInternz</i>	Jul–Sep 2025
<i>Generative AI Virtual Internship (Google Cloud / Vertex AI)</i>	

- Completed a hands-on internship on generative AI concepts and cloud deployment, building working knowledge of platform capabilities and use-case fit – directly transferable to explaining product features and technology trends to customers.
- Built and deployed sample LLM-based applications, practicing how to translate technical functionality and architecture decisions into clear, real-world use cases for varied audiences.

Projects

Guitar-Guru: Guitar Purchase Hub 🔗 | HTML, CSS, JavaScript, React.js

- Built a responsive web platform to browse and filter 500+ product listings by price and category, improving how end users evaluate options and make purchase decisions.
- Integrated reviews and detailed specs to reduce pre-purchase research friction – mirroring the feature-to-need mapping required when advising customers on product fit.

Product Reviews Sentiment Analysis 🔗 | Python, Pandas, scikit-learn, Matplotlib

- Analyzed 25K+ customer reviews to classify sentiment with 81.6% accuracy, surfacing patterns in customer satisfaction – the same analytical lens needed to understand what drives a customer's technology decisions.
- Built an end-to-end pipeline and presented findings via visualizations, practicing how to distill technical results into clear, actionable insights for non-technical stakeholders.

Certifications

- | | | |
|--------------------------------|-----------------------------|------------------------------------|
| • Python – Infosys SpringBoard | • Blockchain – IBM | • MERN Full Stack – Ethnus |
| • Generative AI – Microsoft | • Data Analysis – Microsoft | • Business Analytics – Simplilearn |
