Professional Summary

Computer Science graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, SQL, machine learning, NLP, APIs, and data processing. Built end-to-end ML projects involving data preparation, feature extraction, model training, benchmarking, evaluation, and error analysis using Pandas, NumPy, and scikit-learn. Completed hands-on Generative AI work using Google Cloud Vertex AI and API-based AI applications. Strong analytical and problem-solving skills with interest in LLMs, AI automation, and production-oriented AI systems.

Education

Vellore Institute of Technology

Sep 2022 – Sep 2026

Bachelor of Technology in CSE (Artificial Intelligence and Machine Learning)

CGPA: 8.6

Technical Skills

Programming: Python, SQL, HTML, CSS, JavaScript

CS Fundamentals: Data Structures, Algorithms, OOP, DBMS, Problem Solving

ML / NLP: scikit-learn, Pandas, NumPy, NLP, Classification, Regression, Clustering, TF-IDF

AI / LLM: Generative AI, LLM APIs, Prompt Engineering, Vertex AI, API Integration

Development: FastAPI, REST APIs, Git, GitHub, Jupyter Notebook, Google Colab

Tools: VS Code, Excel, Matplotlib, Seaborn

Projects

Product Reviews Sentiment Analysis 📄 | Python, Pandas, scikit-learn, TF-IDF

- Processed 25K+ Amazon product reviews and developed a Logistic Regression model for sentiment classification, achieving 81.6% accuracy on test data.
- Built an end-to-end NLP workflow covering data cleaning, text preprocessing, TF-IDF feature extraction, model training, and evaluation.
- Analyzed model performance using confusion matrices and classification reports to identify prediction errors and evaluate model quality.

Sentiment Analysis Using EEG Signals 📄 | Python, NumPy, Pandas, scikit-learn

- Developed a Python-based machine learning workflow for EEG-based sentiment and emotion classification.
- Performed data preprocessing, feature extraction, model training, and evaluation to identify patterns in signal data.
- Compared classification approaches using evaluation metrics and analyzed results to support model selection and improvement.

Experience

SmartInternz

Jul – Sep 2025

AI / Cloud Intern

- Completed a virtual internship focused on Generative AI concepts with hands-on implementation using Google Cloud Vertex AI.
- Built sample LLM-based applications involving API integration, prompt design, experimentation, and evaluation of model outputs.
- Worked with cloud-based AI tools to test workflows, analyze outputs, and understand practical AI application development.

Certifications

- Python – Infosys SpringBoard
- Data Analysis – Microsoft
- Business Analytics – Simplilearn
- Generative AI – Microsoft
- MERN Full Stack – Ethnus
- Blockchain – IBM
