Professional Summary

Computer Science graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience building software applications, APIs, AI workflows, and data-driven systems. Strong foundation in Python, JavaScript, SQL, object-oriented programming, databases, REST APIs, and software testing concepts. Experienced in input validation, output validation, debugging, error analysis, workflow testing, and iterative development. Strong analytical and logical problem-solving skills with interest in software quality engineering, test automation, API testing, and AI-assisted software development.

Education

Vellore Institute of Technology

Sep 2022 – Sep 2026

Bachelor of Technology in CSE (Artificial Intelligence and Machine Learning)

CGPA: 8.6

Technical Skills

Programming:	Python, JavaScript, SQL
CS Fundamentals:	OOP, Data Structures, Algorithms, DBMS, Problem Solving
Testing:	Software Testing Fundamentals, Functional Testing, Test Scenarios, Input Validation, Output Validation, Debugging, Error Analysis
APIs / Web:	REST APIs, FastAPI, HTTP Basics, Web Technologies
AI / ML:	Generative AI, LLM APIs, Pandas, NumPy, scikit-learn
Tools:	Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Google Cloud Vertex AI

Experience

SmartInternz

Jul – Sep 2025

AI / Cloud Intern

- Built and tested Generative AI applications using Google Cloud Vertex AI, APIs, and prompt-based workflows.
- Validated model outputs, investigated unexpected results, and iterated on workflows to improve reliability and consistency.

Selected Projects

Customer Churn Prediction & Retention | Python, FastAPI, Pandas, scikit-learn

- Built a Python-based decision-support application for predicting customer churn and generating explainable retention recommendations.
- Implemented input schema validation, data preprocessing, model evaluation, and FastAPI-based API inference.

Smart Study Quiz | JavaScript, HTML, CSS

- Built an interactive web application using JavaScript, HTML, and CSS with user-driven quiz and application workflows.
- Implemented application logic and validated user interactions, expected outputs, and edge cases during development.

Agent-Ready 100 – AI Product Ops & Research Automation | HTML, CSS, JavaScript

- Built a research automation workflow evaluating the integration readiness of 100 applications for AI-agent use cases.
- Implemented automated evidence checks, contradiction detection, verification workflows, and human review for low-confidence results.

Certificates & Training

Python – Infosys SpringBoard

Data Analysis – Microsoft

Generative AI – Microsoft

Business Analytics – Simplilearn

MERN Full Stack – Ethnus

Blockchain – IBM
